NHPC hands over radiology building to Mbandjock District Hospital

Radiology now available in Mbandjock

NHPC conducted on 4 November 2025 the handover and official inauguration of a fully constructed and equipped radiology unit at the Mbandjock District Hospital, during a ceremony attended by the NHPC Chief Executive Officer, as well as administrative, health, traditional authorities and local communities of the Mbandjock subdivision.

Worth more than 25 million FCFA, this radiology unit—entirely funded by NHPC—extends the company's social initiatives in Mbandjock's health sector since 2020. These initiatives include training community health workers, supplying modern medical equipment, and providing protective materials during the Covid-19 pandemic.

Through this initiative, NHPC reaffirms its commitment to sustainably improving access to quality healthcare for communities in the Nachtigal project area.

«The radiology building and the equipment delivered today by NHPC are crucial for our locality, which lies along National Road No. 1, an accident-prone route. Until now, patients had to be referred to Yaoundé for imaging tests, and the long journey often worsened their condition. From today, both basic and advanced radiology services can be provided here on site, for the benefit of communities in Haute Sanaga and the surrounding areas. »

Director of the Mbandjock District Hospital

A few images from the first radiology test, the equipment provided, and the radiology building constructed and equipped by NHPC.
