## NHPC welcomes the Minister of Water and Energy at the Nachtigal site

### Over 2 TWh generated by Nachtigal since commissioning

On 18 March 2026, the Minister of Water and Energy, Gaston Eloundou Essomba, carried out a working visit to the Nachtigal hydroelectric facility, in the presence of Claire Gall, General Manager of NHPC, and other key players in the energy sector, including SONATREL, ENEO, ARSEL and EDC.

The visit was part of the performance monitoring of the Nachtigal power plant since its full commissioning in May 2025. With an installed capacity of 420 MW, Nachtigal generated over 2 TWh in 2025, contributing approximately 30% of the supply to the Southern Interconnected Grid. On this occasion, the Minister expressed his satisfaction with the recorded performance and the quality of the plant's operations.

### Teams mobilised around the clock, 7 days a week

The visit enabled the delegation to tour the site's main infrastructure, including the main dam, the powerhouse and the control room. It also highlighted the unwavering commitment of the operations teams, mobilised 24 hours a day, 7 days a week, to ensure the availability, safety and performance of the facilities.
