NHPC engages stakeholders on the Mpem and Djim National Park offset program

A collective commitment for sustainable conservation

The 15th of April 2025, NHPC organized, in collaboration with BRL Ingénierie and Alt Dev, a planning and consultation meeting with stakeholders on the biodiversity compensation program, the offset, implemented within the Mpem and Djim National Park.

Chaired by the Divisional of the Mbam and Kim Department, the meeting brought together administrative, municipal, judicial and traditional authorities of Mbam and Kim, representatives of sectoral administrations, representatives of national and international civil society organisations, communities living near the PNMPD, as well as NHPC's technical partners.

La réunion avait pour objectifs de présenter le programme d'Offset de NHPC dans le Parc National du Mpem et Djim et de renforcer l'adhésion des parties prenantes, essentielle à son acceptabilité sociale, sa conformité réglementaire et sa bonne mise en œuvre. Les échanges ont permis de mieux cerner les enjeux du programme, de recueillir les préoccupations et attentes des différentes parties, et de renforcer la confiance mutuelle entre les acteurs impliqués.

During the meeting, the Prefect of Mbam and Kim, speaking on behalf of the Government, welcomed NHPC's commitment to biodiversity conservation and sustainable development, thereby reaffirming the public authorities' support for this initiative. All the recommendations made will enable NHPC to strengthen the implementation of the offset program with a view to continuous improvement.
