The Francophonie Parliamentary Assembly visits the Nachtigal power station

Family photo taken during the Francophonie Parliamentary Assembly's visit to the Nachtigal power station

Over 980 GWh injected since the start of 2026

On the sidelines of the 51st Session of the Francophonie Parliamentary Assembly (APF), held in Yaoundé from the 7th to the 11th of July 2026, a delegation of around 100 French-speaking parliamentarians, led by Hilarion ETONG, President of the APF and First Vice-President of the National Assembly of Cameroon, visited the Nachtigal hydroelectric facility on the 8th of July 2026.

This visit, which took place in the presence of Claire GALL, Managing Director of NHPC, and administrative and traditional authorities of the Nachtigal project area, enabled the parliamentarians to explore the main facilities at Nachtigal via two key stops: the dam and the power station. They were able to learn about the performance of the Nachtigal power station, which has already injected more than 980 GWh into the national electricity grid since the start of 2026.

An exemplary partnership between public authorities and private sector partners

The visit by parliamentarians from the Francophonie demonstrates the organization's interest in major infrastructure projects that contribute to the economic and energy development of its member countries. It provided NHPC with an opportunity to highlight that it is possible to build world-class infrastructure in Cameroon, such as the Nachtigal hydroelectric facility, thanks to exemplary cooperation between the public authorities and private partners.

As a reminder, the Nachtigal hydroelectric facility has an installed capacity of 420 MW, meeting nearly 30 per cent of Cameroon's electricity needs. With its green, readily available and competitively priced electricity, Nachtigal is now one of the key players in Cameroon's electricity system and contributes to the country's sustainable development.
